

DETAILS :

This competition is organized by the **Financial Modeling World Cup**. This company is a multinational firm that organized many events in which students from all around the globe participated in a competition to test their financial skills. Like these events, **Maarij, Swaleh, and Aliza** participated **Microsoft Excel Collegiate Challenge**, in which we solved multiple financial case studies. This challenge is divided into three sections, so you can take part as an individual, as a team, or with others. We participated in that event as individuals. In this event, **1930** students registered themselves to participate in that event. Many universities in **Pakistan** have students register for that event, such as
