

Workshop on Dimensional Modelling and Data-Driven Scorecard for Business Analytics

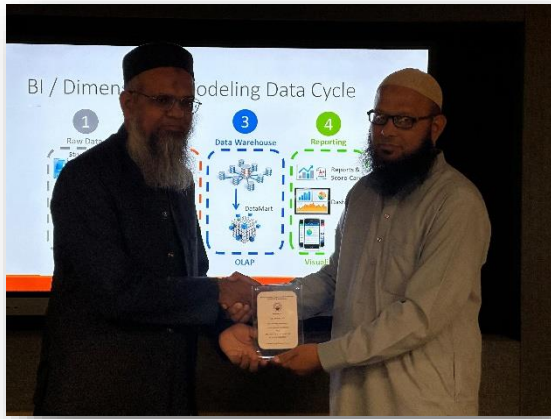

We're excited to share a recap of the recent workshop held on 16th November, 2023 on Dimensional Modelling and Data-Driven Scorecard for Business Analytics, featuring our esteemed guest speaker, Mr. Murad Ali.

Mr. Murad Ali's expertise illuminated the workshop, providing attendees with valuable insights into the intricacies of dimensional modelling and the development of data-driven scorecards for business analytics. The practical applications discussed during the session offered a comprehensive understanding of these critical concepts. Attendees delved into the world of data-driven scorecards, gaining valuable skills for leveraging analytics in business decision-making.

It is with great pleasure that we share a moment of appreciation bestowed upon Mr. Murad Ali. The Chairman of the Mathematics Department, Mr. Mirza Mehmood Baig, presented a token of gratitude in recognition of Mr. Murad Ali's invaluable contribution to the workshop. This gesture underlines our appreciation for his time, knowledge, and commitment to enhancing our understanding of these vital topics.

We extend our sincere gratitude to Mr. Muhammad Amin for orchestrating this enlightening session. His efforts in arranging the workshop have been instrumental in its success.

The enthusiasm and active participation of the audience contributed significantly to the success of the session. We were pleased to witness an audience that was not only interested but also interactive, fostering a dynamic and enriching learning environment
